

The colours of Catellani & Smith at Euroluca 2023 and in the Salvioni Milano Durini showroom

Catellani & Smith will be taking part in the 31st edition of **Euroluca**, showcasing new creations that celebrate the **power of colour**.

Primary colours and fluo shades such as orange, blue, yellow and magenta shape rods, semispheres, bases and unexpected details: from the **Ettorino** and **Ale** collections to **Cono W** and **Talismano**, the new lamps bring a lively touch to settings. The coloured models are joined by lamps in classic black and white, as well as the distinctive mirror finish of **Sfera W**.

And for the first time, visitors will have the chance to admire **Ensō**, the exclusive lamp designed by **Enzo Catellani**, inspired by a spontaneous movement that takes on a three-dimensional character. A sculptural lighting object that projects a soft light onto the wall.

The new lamps are also on display in the **Salvioni Milano Durini** showroom, which has been hosting Catellani & Smith creations in Milan for some years now. The new creations, together with custom projects and the brand's most significant lamp models, are showcased in the settings featured on the various floors of the historical building, offering suggestions for new interior design ideas.
